SAP BAIP Custom AI Hands On

KEYWORDS

AI Core · Prompt · Embedding · Reranker · Grounding · SAP RPT · Agent · A2A

LEARNING JOURNEY

STEP 01 · AI FOUNDATION

STEP 01

AI Core Foundation

Connect your AI environment and confirm a running deployment.

1 **AI Core** Service credentials → 2 **Connection** Secure authentication → 3 **Deployment** Running model

STEP 02 · LLM INTELLIGENCE

STEP 02

LLM Intelligence

Design the question, find relevant context, and choose the best answer.

1 **Prompt** Define the question → 2 **Embedding** Find relevant context → 3 **Reranker** Select the best match

STEP 03 · TRUSTED GEN AI SERVICES

STEP 03

Trusted Gen AI Services

Orchestrate AI, ground answers in documents, and review decisions.

1 **Orchestration** Control the flow → 2 **Grounding** Verify document evidence → 3 **SAP RPT** Review prediction results

STEP 04 · AGENT ORCHESTRATION

STEP 04

Agent Orchestration

Coordinate workflows, tools, and agent-to-agent handoffs.

1 **Workflow** Plan and route work → 2 **Tool Use** Read and act safely → 3 **A2A** Hand off to another agent

SUMMARY

Orchestration Agent Pain Points

	PAIN POINT		SOLUTION
1	Orchestration Delegation [illegible]	→	RPT Decision Route
2	Orchestration Delegation [illegible]	→	Agent with ReAct CoT
3	Orchestration Delegation [illegible]	→	BAIP Grounding
4	Orchestration Delegation [illegible]	→	Joule Studio & Agent Gateway
5	SubAgent Context	→	Managed Joule Assistant & Agent
